

GLS Out of Home network grows again

The GLS Out of Home network is expanding rapidly, with more and more GLS Points available throughout Italy. Our goal? To make deliveries even more convenient and flexible for recipients, offering a simple, fast and tailored to their needs pick-up experience.

🎉 An important milestone

We have just installed **the 50th GLS Locker**. We are present in some of Italy's major cities - including **Rome, Milan, Bergamo, Bologna and Turin** - and we are not stopping there!

Our network now has **over 8,000 active pick-up points in Italy**, including affiliated shops and automated lockers, to cover the territory extensively and offer greater flexibility in terms of time and location.

Why is it crucial to enable OOH deliveries?

An efficient Out of Home network helps to:

- reduce failed delivery attempts
- increase customer satisfaction
- simplify last-mile logistics
