Press release

**GLS Poland becomes a delivery partner for Vinted.
Second-hand shopping made even easier**

GLS Poland has officially joined the group of logistics partners of Vinted, Europe's leading platform for second-hand fashion sales and a popular marketplace for various types of used products. Thanks to this cooperation, Vinted users can conveniently send and receive parcels at GLS Points and parcel machines throughout Poland.

The choice of GLS is no coincidence. Vinted has chosen GLS as its logistics partner not only in Poland, but also in the Czech Republic, Croatia, Denmark, Slovakia, Romania, and Hungary. The cooperation will soon be extended to Slovenia. **Convenient out-of-home delivery and clearly defined rules of cooperation are key to this model.**

The cooperation between GLS and Vinted is based on a transparent point-to-point model, in which shipments sent from one point are delivered directly to another point or parcel locker. After a successful sale on the Vinted app, the user automatically receives a print-ready PDF label with the shipment number, and the shipment details appear in the GLS system within a maximum of 90 minutes. Both the sender and the recipient are informed about the status of the shipment. The sender receives a confirmation, and the recipient receives delivery information by email and SMS.

Parcels are available for collection for 3 days at parcel machines and 7 days at collection points.

What are the benefits of working with GLS Poland for Vinted users?

- **Convenience** - sending and receiving shipments without having to wait for a courier.
- **Speed** - labels generated automatically in the Vinted app.
- **Predictability** - point-to-point parcel transport.
- **Full information** - notifications at every stage of delivery, including parcel tracking on a map as part of the GLS Live Tracking service, with a precise delivery time window of up to 15 minutes

The cooperation between GLS and Vinted combines two perspectives: that of a logistics operator consistently developing a convenient out-of-home delivery network, and that of a recommerce platform for which convenience and user experience are of key importance.

At the heart of this cooperation is the consumer, who gains fast, reliable, and hassle-free access to shipments based on high delivery quality standards.

Piotr Ziółkowski, National Key Account Manager, GLS Poland:

"The cooperation with Vinted is an important step for GLS in the development of services aimed at the recommerce community. Vinted users fit perfectly into the trend of out-of-home deliveries, and high quality and timeliness are the foundation of our cooperation. We are happy to support millions of people in conveniently sending and receiving parcels."

This initiative is the next step in the development of logistics services for the rapidly growing recommerce market. Thanks to deliveries to collection points and parcel machines, users gain greater flexibility, and the entire process of sending and receiving parcels becomes faster and more predictable.

Both companies announce further development of their cooperation and expansion of its scope in order to more effectively support the European community of buyers and sellers of second-hand products.

About the GLS Group

The GLS Group is one of the largest independent courier service providers in Europe, with an extensive active presence in almost all countries on the continent. Through its network of subsidiaries, it also operates in Canada and on the West Coast of the USA. Every day, this enables GLS to efficiently deliver millions of parcels and related stories to customers and communities. GLS manages its network proactively, connecting the markets in which it operates in a flexible and agile manner, responding to their rapid changes and dynamics. The company is proud to provide its customers with high-quality services in over 40 countries. The GLS network consists of more than 120 distribution centers, over 1,600 branches, more than 36,600 last-mile delivery vehicles, and 6,500 trunk line vehicles. This guarantees excellent flexibility and increased coverage. In 2023/2024, the GLS Group generated record revenues of €5.6 billion, delivering 905 million parcels across all markets served.
